

Industry: Test
Application: Test Equipment

Summary: This 75 Watt single card converter provides conversion from 24V to -24V. Up to three hot swap cards can be paralleled for N+1 redundancy with forced current sharing.

Specifications

Input: 18-36 Vdc

Output: -24 Vdc

Total Power: 75 Watts

Dimensions: 5.5"W x 1.5"H x 6"L (fits in standard US telecommunications "400" size shelf)

Operating Temperature: -25 to +50°C

Cooling: Convection

Other Features: N+1 redundancy
Forced current sharing
Current limit
Hot-swappable

*N-1002: N+1 Redundant
Hot-Plug 24/-24V Converter*
